

The 7th Bi-annual General Assembly Meeting for the SATREPS project held in April

T. Matsushita, Project Researcher, IIS, The University of Tokyo

The 7th General Assembly meeting for the SATREPS project “The Development of a Comprehensive Disaster Resilience System and Collaboration Platform in Myanmar” was held on the 27th April 2016 at ICUS lecture room. Twenty two project members and six members from Japan Science and Technology (JST) and Japan International Cooperation Agency (JICA) have participated the event. Leaders of each of six research groups have presented the project progress followed by discussions by the participants. It was a good opportunity for the members who are usually working independently to come to the same table to discuss various issues and exchange ideas. Mr. Takara from JST who is an executive in charge of the project gave a comment at the end of the meeting to emphasize the importance of this type of project dealing with disaster management from multiple perspectives and stressing the importance of bringing these various technologies and knowledge together to strengthen disaster resilience of Myanmar.

Presentation by Disaster Management Group leader Prof. Meguro

Comment by Dr. Takara, an executive in charge of the project
