

Meeting for Disaster management group with YTU and Numada on 12th and 13th of September 2017

M. Numada, Associate professor, ICUS, IIS, The University of Tokyo

Disaster management group with YTU member and Numada discussed about the current developed system. Now the geological data observed from YTU was already database into the system.

YCDC and Numada discussed about how the system can be used for the data platform to share the necessary data.
