A Workshop for Graphical User Interface Design for Water Resource Management System *April 12th 2018*

Akira Kodaka, Naruhiko Sgira, Researcher, Keio University

A workshop for Graphical User Interface (GUI) design was held on April 2nd at YTU SATREPS Meeting Room. The workshop was designed for stakeholders involved in water resource management of Bago River Basin so as to utilize relevant data –observed from the installed stations and processed ones - to facilitate their countermeasure operations against flooding. Seven officers from IWUMD, DWIR, and DHP joined the workshop and presented their needs of data for their operations with preferable GUI design of water resource management system to be developed.
